

TD-24

MANUFACTURER: ZARYS International Group sp. z o.o. sp.k.

ADDRESS:

ul. Pod Borem 18, 41-808 Zabrze, Poland, phone +48 32 376 07 00-02,06 fax. +48 32 370 38 08

INDICATION:

- Device is designed to produce an aerosol containing fragmented medication, which can be delivered deep into the respiratory system with the patient's inhalation
- Enables nebulisation to be carried out in mechanically ventilated patients by connecting directly to the endotracheal tube, tracheostomy tube or inspiratory arm of the ventilator breathing system
- Allows you to perform nebulisation in patient "on one's own breath"

FEATURES:

- Made of non-toxic materials
- 210 cm long, bend-resistant tubing with star-shaped cross-section
- Nebuliser with a 6ml capacity (graduated every 1ml), producing particles with an average size of MMAD = 3.91 µm at a flow rate of 6 l/min.
- Nebuliser, tubing, T-adaptor, mouthpiece, one-way valve and corrugated tube included in a kit
- Universal T-adaptor with a diameter of 22M/15F -22F enables the kit to be connected to:
 - endotracheal or tracheostomy tube
 - breathing circuit

and perform nebulisation on mechanically ventilated patients

- The universal (detachable) mouthpiece allows nebulisation to be given to patients who are breathing on their own
- Silicone one-way valve (detachable) reduces medication waste during nebulisation
- Single-use
- Latex-free
- Phthalate-free
- Sterile, ethylene oxide sterilised
- Packaging: 1 pc. / paper-foil
